

Proposed Design N. Ferry St Pump Station

October 19, Open House
City Hall Presentation

Perspective looking east from Governor's Lane

Perspective looking west from river walkway

Current historic building in foreground,
new to west, generator behind

Perspective from end of N. Ferry St.

Three structures located in current fence line

West side fence line less than 30 feet into parkland (10–15 feet)

North side fence line pulled back from existing river walkway

Materials and window design meet SHPO requirements
